Allowable Subject Matter

2. Claims 12 - 13 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding **claim 12**, the prior art of record fails to teach or fairly suggest an image sensing apparatus comprising: a calculating unit configured to generate two-dimensional correction data by expanding the one-dimensional correction data in a vertical direction, which is stored in the storage unit; and a control unit configured to read the one-dimensional correction data in the horizontal direction from the storage unit in accordance with the image **ISO (International Organization for Standardization)** sensitivity set by the setting unit, and control the calculating unit so as to generate the two-dimensional correction data by **expanding** the read one-dimensional correction data in the vertical direction; in combination with other elements of the claim.

Regarding **claim 13**, the prior art of record fails to teach or fairly suggest a control method for an image sensing apparatus which comprises a plurality of pixels arrayed in a horizontal and a vertical direction, a storage unit configured to store a plurality of one-dimensional correction data in a horizontal direction in accordance with a plurality of image **ISO (International Organization for Standardization)** sensitivity settings, and a setting unit configured to set image **ISO (International Organization for Standardization)** sensitivity, the method comprising: generating two-dimensional correction data by **expanding** the read one-dimensional correction data in a vertical direction; correcting image data outputted from the plurality of pixels by using the generated two-dimensional correction data; in combination with other elements of the claim.

Conclusion
